Subject: RE: consult on UIC permit for Dewey Burdock

Hi Qian and Amy,

Valois in the UIC program will be reaching out to one of you. They'd like some assistance with some surface water comments they received. Everett will also assist. I spoke with Douglas, and if the comments are more stormwater related, they'll reach out to Amy. If the comments are more about other types of discharge concerns, I asked them to reach out to Qian.

Thanks,
Stephanie/

Subject: consult on UIC permit for Dewey Burdock

Hey Stephanie,

The UIC program has received a number of comments on surface water impacts from the Dewey Burdock UIC permit, and the UIC staff was hoping someone from your unit might lend them a hand in considering those. I said I'd ask you, and that I would participate, as well. Any chance you could send someone Douglas Minter's way for a consult. Maybe Qian? I recall he has some experience with UIC in addition to NPDES.

Thanks!
Everett
